Arm26 Continual Learning vs. 0.5kg Fixed PI vs. 5kg High-Gain PID vs. Naive Online NN
EWC lambda=95 | Cable Limit=240 N

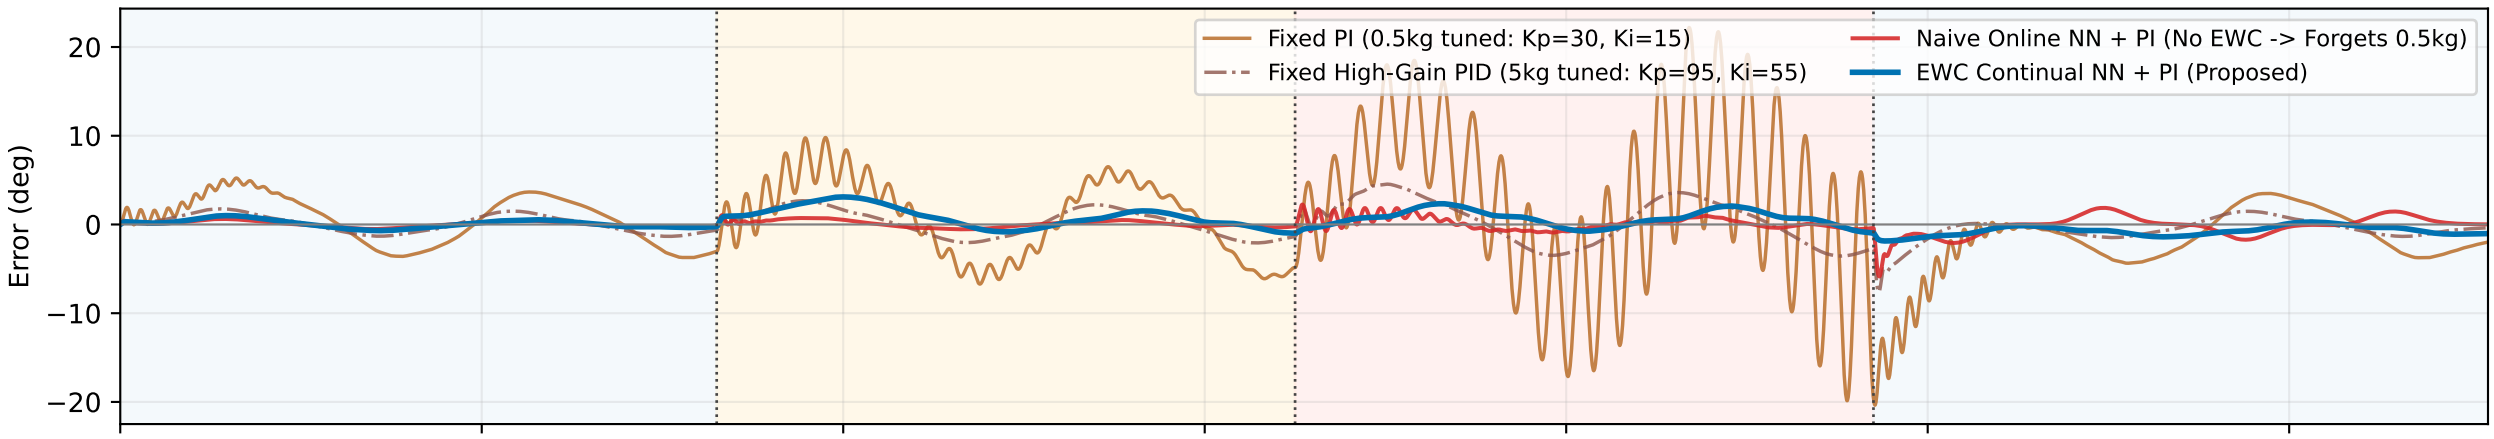

1. Scheduled Dumbbell Mass Exchanges (0.5 -> 2 -> 5 -> 0.5 kg)

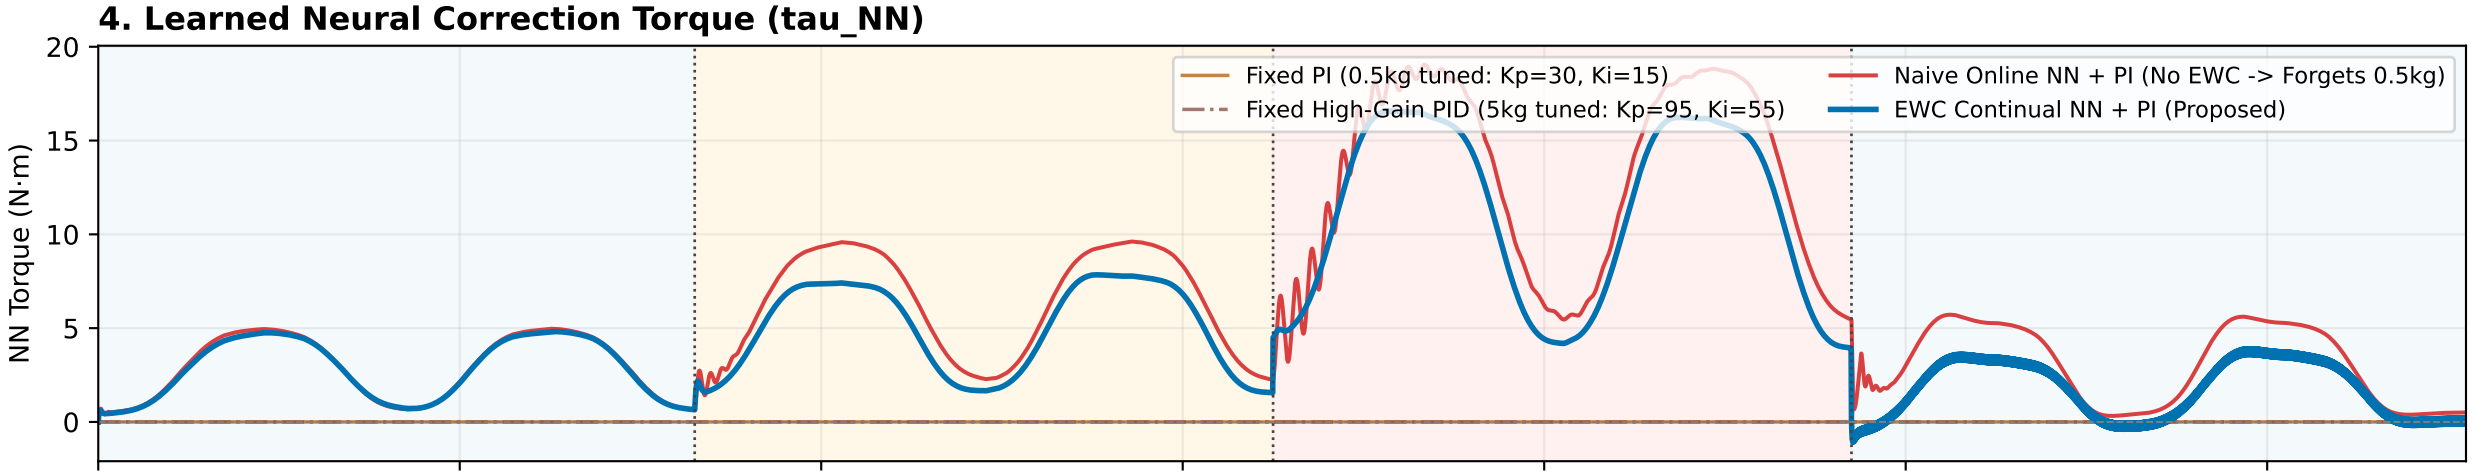

2. Joint Angle Tracking Across All 4 Controllers

3. Tracking Error (Target - Actual)

4. Learned Neural Correction Torque (tau_NN)

5. Applied Flexor Cable Tension
