Arm26 Continual Learning: Fixed PI vs. Naive Online NN vs. EWC-Protected NN
Base Kp=30, Ki=15 | EWC lambda=90 | Cable Limit=240 N

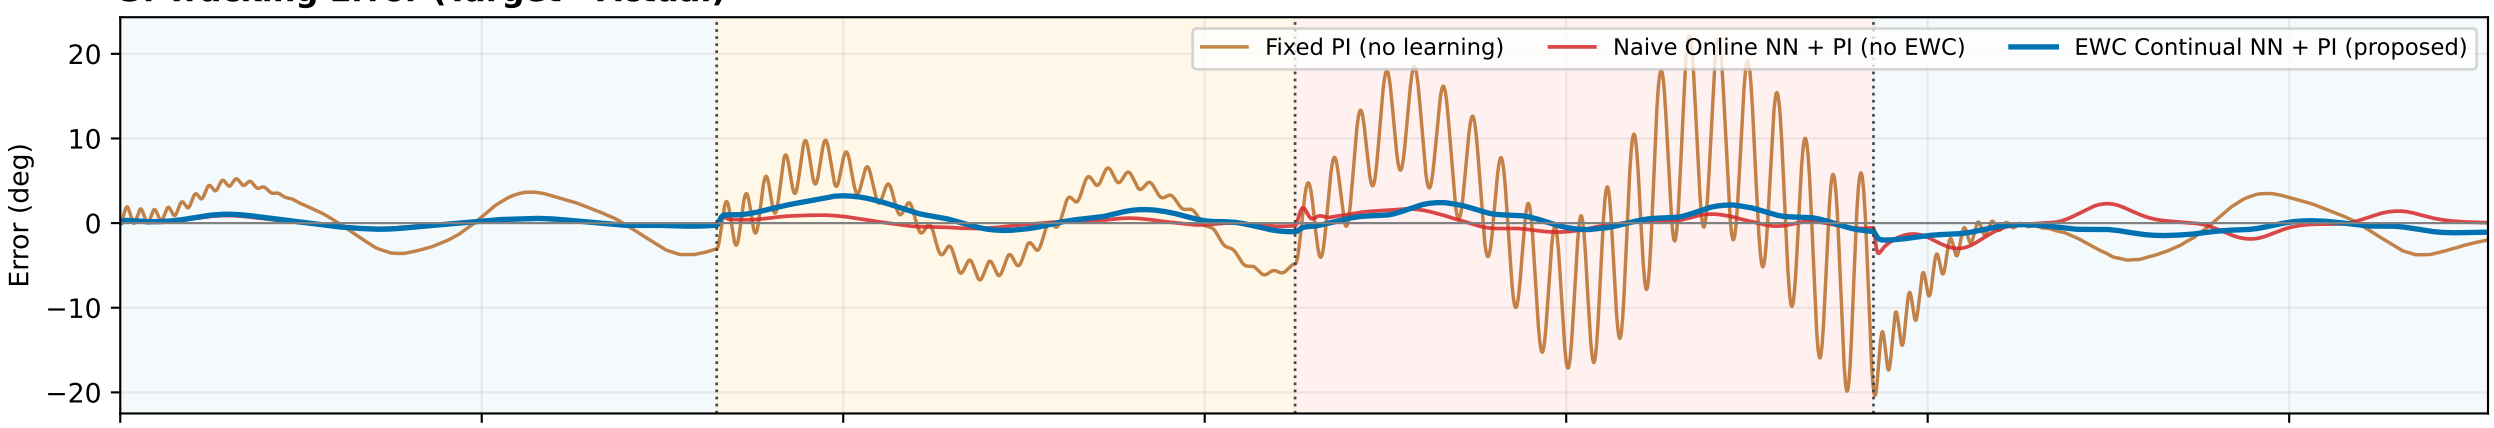

1. Scheduled Dumbbell Mass Exchanges (0.5 -> 2 -> 5 -> 0.5 kg)

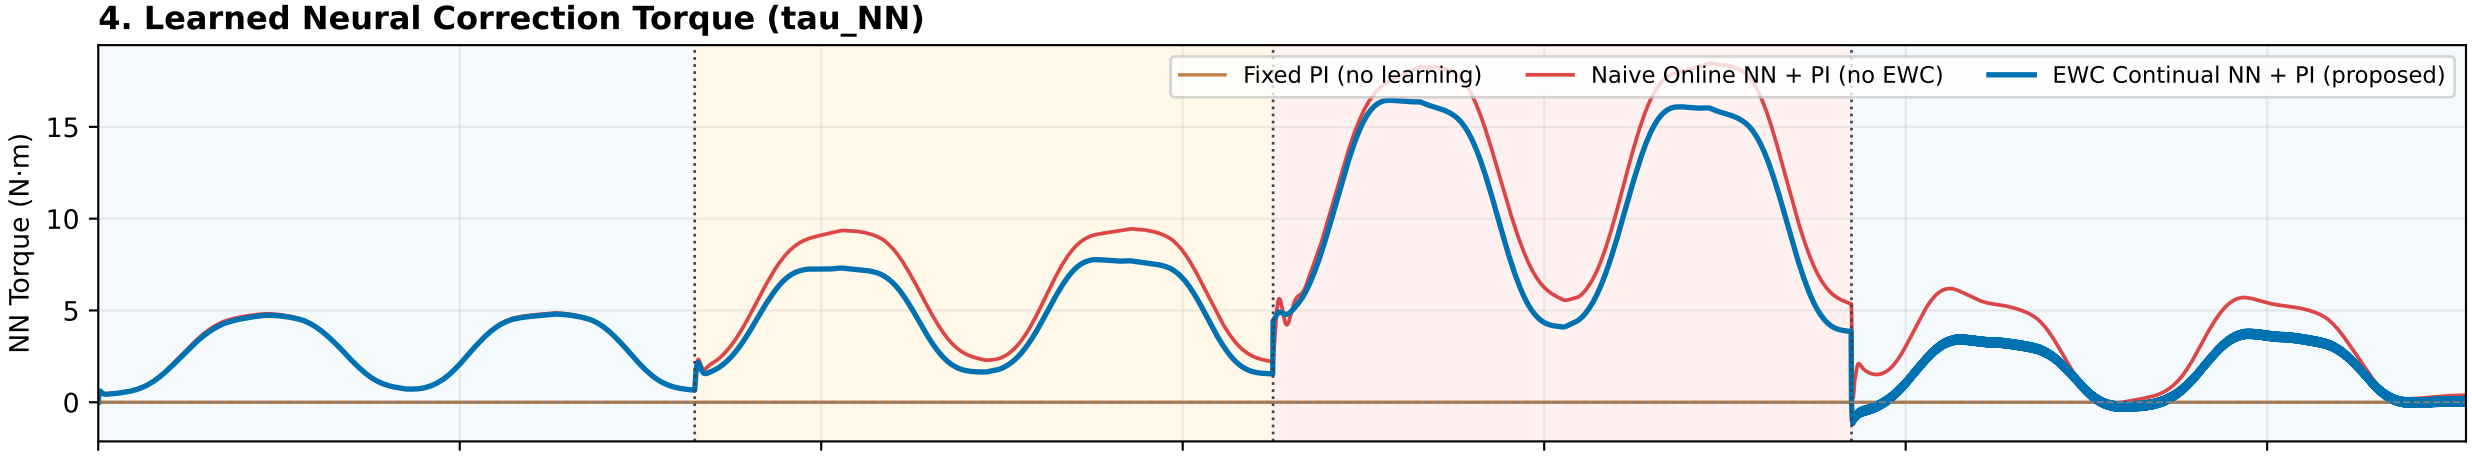

2. Joint Angle Tracking

3. Tracking Error (Target - Actual)

4. Learned Neural Correction Torque (tau_NN)

5. Applied Flexor Cable Tension
